

EffiIndividual

Powerful Tools and Complete Configuration Mean the Final Word in Laboratory Management

The power of EffiValidation, the control of EffiQS, plus the ability to create endless module configurations to meet the individual needs of your lab. Make sure your data is where you want it, when you want it, how you want it. It's the only quality solution you'll ever need.

Modules, Method Validation, and Laboratory/Quality Management Features

General

- Database (Firebird or MS SQL)
- User-Defined Software Design
- System ID and Searching
- Print/Export
- Master Data

Methods

- Method Validation
- Uncertainties
- Control Charts/Trending
- Calibration
- Inter-laboratory Comparison
- User-defined Acceptance Criteria

LIMS/QMS

- Samples and Specifications
- Equipment
- Documents
- Deviations
- Quality Trending
- Reference Standards
- OOS
- Controlled Documents
- Training
- Risks (register)
- CAPA Management
- Audits and Observations
- Complaints
- Change Controls

Static Data

- Units
- Norms
- Personnel
- Departments
- Rooms
- Contacts
- Customers
- Manufacturers
- Suppliers

Compliance and Security

- User Privileges, Security Policy, Audit Trail
- Software Validation (IQ, OQ)
- 21 CFR Part 11 (e-Records and e-Signatures)

EffiIndividual

All Method Validation, LIMS/Quality Management Features*

- Multi-Component Analysis
- HPLC System Suitability (FDA/PhEur)
- System Suitability
- Method Transfer
- Retrospective Validation
- Validation of main substance determination
- Validation of impurity determination
- Sample login and management
- Sample tracking
- Chain of custody
- Task and event scheduling
- Optional manual result entry
- Multiple data viewing methods
- Data analysis
- Data and equipment sharing
- Fully customizable interface
- Query capability
- Data import
- Internal data linking
- Raw data management
- Data warehouse
- Deadline control
- Task management
- Inventory management
- Document creation/management
- Specification management
- Customer management
- Supplier management
- Manufacturer management
- QA/QC tools
- Dynamic workflows
- Quality Trending
- Performance evaluation
- Global audit trail
- Audit trail by record
- Configurable roles/security and Administrator management
- Version control
- Data backup
- Custom reporting
- Report printing
- Label support
- Barcode support
- Export reports to PDF
- Export to MS Word, XML, HTML
- Module-based
- Instrument interface/management
- Mobile device integration
- Alarms/alerts
- Multilingual

*In addition to modules listed on reverse side.
